

AI SUPER KIDS

AI INNOVATORS

GRADES 7-8

Solve Problems with AI

A structured program for data literacy, responsible research and practical AI solution design.

SCHOOL PARTNERSHIP PROGRAM

Course Modules 01–08

Students learn how AI uses data, how bias affects results and how clear prompts improve research and creative work.

01

Understanding Machine Learning

Explore how machines learn from examples and patterns.

02

Data Literacy

Collect, organise, interpret and present information.

03

Data Quality

Understand how missing or incorrect data affects results.

04

AI Bias and Fairness

Recognise biased outputs and consider fair use.

05

Advanced Prompting

Add goals, context, constraints and output formats.

06

AI-Assisted Research

Develop questions, summarise and compare sources.

07

Automation Concepts

Explore rules, workflows and repetitive task automation.

08

Design Thinking

Understand users, define problems and develop ideas.

CORE CAPABILITIES

Data literacy

Bias awareness

Research

Automation

Design thinking

Verification

Study the data Question the output Improve the idea

Course Modules 09–13

09

AI Solution Design

Match a real-world problem with a suitable AI-supported concept.

10

Prototyping

Build a model, workflow, storyboard or interface concept.

11

Testing and Improvement

Collect feedback, find weaknesses and strengthen the idea.

12

Responsible Innovation

Consider privacy, safety, bias, accuracy and copyright.

13

Project Presentation

Explain the problem, research, solution and expected benefit.
